

1. Overview

The results of each competition are collected and entered into the EVF database.

This document shows how this is done.

There are 2 parts to the process:

- a) Collection of results in a simple tab separated format
- b) Import of the results into the database

Both stages can have pitfalls and these are explained.

2. Collection of Results

Results are accumulated in a folder on the user's computer. Create a folder named eg 2019-Cognac

For this event, an EVF Individual Championships, there will be 30 files of results corresponding to the 30 competitions:

2 genders x 3 weapons x 5 categories = 30 competitions.

The format of a results file is: Place (tab) Surname (tab) Firstname (tab) Country

For example:

1	GOETZ	Gregory	FRA
2	DELATTRE	Benoit	FRA
3	RUDENKO	Sergii	UKR
3	PEYRET LACOMBE	Emmanuel	FRA
5	ROTA	Carlo	ITA

For consistency of character handling it is recommended that the results provided by the organisers are Copy & Paste'd into an Excel spreadsheet. Any surplus columns can be deleted. Then the 4 columns can be Cut & Paste'd into a Notepad text file and saved.

3. Import of Results

Log into the EVF application: <http://www.european-veterans-fencing.com/login.php>

A user name and password can be obtained from the Webmaster or the Secretary.

The opening window is shown:

Rank

Rules Ranking is based on:

- the last 2 European Individual Championships: Cognac, 2019 and Chiavari, 2017

Filter
 Weapon: **Mens Epee** Category: **Cat 1** Found 95 fencers Search

Id	Surname	Firstname	Country	Points	Rank	View

Click on the Import button to process the data.

A summary report is then presented:

Import Summary: Cognac, 2019 MS Cat 5

Lines read	15
Lines rejected	0
Records added	0
Records updated	14
Records missing a country	0
Records missing a dob	0
Import table in result-net, 'Import'	0

Fencer not found	BARON	Pete	GBR	Add Fencer	Could it be BAILLACHE, Paul	Update Name
					Could it be BARON, Peter	Update Name
					Could it be BARTLETT, Anthony	Update Name
					Could it be BARNES-WEBB, Richard	Update Name
					Could it be BARNETT, Keith	Update Name

The Records Updated (14) does not match the Lines Read so there is a problem somewhere.

The diagnostic message below the summary table shows that the fencer name Baron, Peter is not recognised in the database and alternatives are suggested which includes Baron, Peter.

Change the results file and import the file again:
